26 jiseon@jiseon-ThinkPad-T420:~/Desktop/Ph20/ph20_hw4$ git push
27 warning: push.default is unset; its implicit value has changed in
28 Git 2.0 from 'matching' to 'simple'. To squelch this message
29 and maintain the traditional behavior, use:
30
31   git config --global push.default matching
32
33 To squelch this message and adopt the new behavior now, use:
34
35   git config --global push.default simple
36
```

```
37  When push.default is set to 'matching', git will push local branches
38  to the remote branches that already exist with the same name.
39
40  Since Git 2.0, Git defaults to the more conservative 'simple'
41  behavior, which only pushes the current branch to the corresponding
42  remote branch that 'git pull' uses to update the current branch.
43
44  See 'git help config' and search for 'push.default' for further information.
45  (the 'simple' mode was introduced in Git 1.7.11. Use the similar mode
46  'current' instead of 'simple' if you sometimes use older versions of Git)
